

PLACEMENT SERVICES

Productive Resource's recruiting team collaborates with you to identify the best talent on the market to promptly fill your individual hiring needs.

Our recruiters will send you the most relevant candidates in their networks to help reduce the time from opening a job posting to a signed offer letter. They are here to listen to both your team and the candidate to match everyone with the best possible fit.

Contingent Staffing & Project Based Contracts

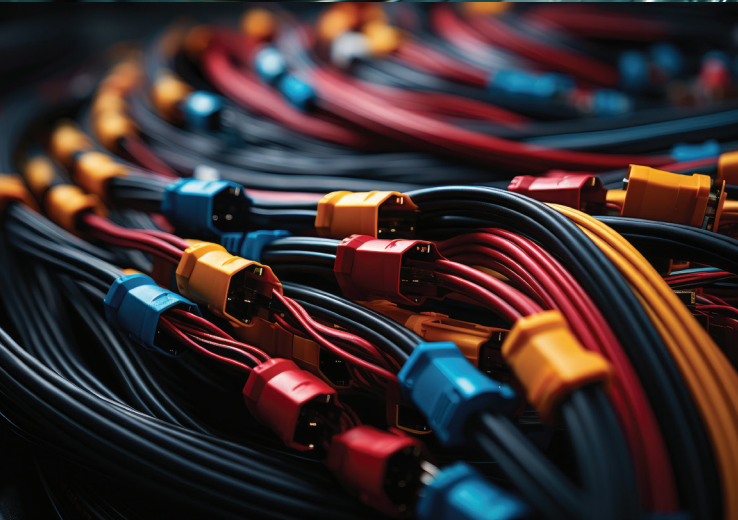

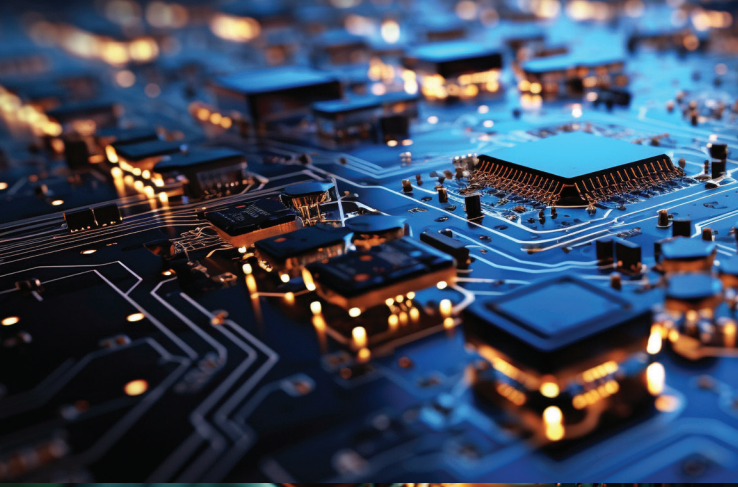

Do you need some temporary help on your team? Our contract placements can help assist you in getting your project completed on schedule or fill a skill gap on your existing team. We can provide software and equipment to the contingent worker while you provide the work to them. We will even take care of the paperwork and onboarding, so minimal effort is needed from your HR team!

Direct Hire

Seeking a new employee to directly join your organization? Productive Resources can help find a permanent placement for your team! Our recruiters will work with your management staff to find the perfect fit for your individual needs. If you are interested in bringing someone on but unsure of the duration of your team's workflow, we can support contract to hire. Our recruiters will take the lead in selecting the best candidates, coordinating interviews, and managing the offer and negotiation process.
